

KCL – Professional hand protection for Europe

Designation:

DERMATRIL®

Article no.:

740

Specification:

Colour: Blue	Material: Nitrile	Length: 250 mm ± 10
Thickness: 0,11 ± 0,03	Description: Rolled edge, chlorinated, roughened fingertips, powder free	Size: 06 07 08 09 10 11
Packing unit: Box of 1 00 gloves / carton of 10 boxes		

Physical data:

Mechanical protection: CAT II According to EN 388		Chemical protection: CAT III According to EN 374		
Abrasion resistance : 0		Penetration level: 3 = AQL 0,65		
Cut resistance : 0		<i>For permeation levels see glove recommendations</i>		
Tear resistance : 0		EN 374 bacteriological contamination:		
Puncture resistance : X		Suitable for food handling:		
Dexterity (according to EN420) : 5				

Description:

With the Dermatrill® KCL managed to develop a disposable protective glove according to EN 374 as a chemical protective glove (Cat. III). It owes this property to the unique, new KCL mixture of nitrile. Apart from the high resistance against chemical and bacteriological contamination, the Dermatrill® disposable protective glove also offers a very good mechanical resistance compared to usual disposable gloves. Moreover, it is free from allergenic substances, such as thiurames, benzothiazoles and thiourea.

Application:

- | | | |
|-----------------------------|---------------------|-----------------------|
| - laboratory and operations | - chemical industry | - food industry |
| - electronic industry | - computer industry | - protection of goods |
| - cleaning and maintenance | | |
