

Designation:

CAMAPREN®

Article no.:

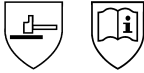

720

Specification:

Colour:	Black	Material:	Chloroprene	Length	300 mm ± 10
Thickness:	0,65 ± 0,1	Description:	Cuff, surface profile, flock lined	Size:	07 08 09 10 11
Packing unit:	100 pairs				

Physical data:

Mechanical protection: CAT II According to EN 388		Chemical protection: CAT III According to EN 374	
Abrasion resistance : 1		Penetration level: 3 = AQL 0,65	AKL
Cut resistance : 1		<i>For permeation levels see glove recommendations</i>	
Tear resistance : 1		EN 374 bacteriological contamination:	
Puncture resistance : 1		Suitable for food handling:	
Dexterity (according to EN420) : 5			

Description:

Camapren® the KCL protective gloves made of polychloroprene, the approved raw material with the good balanced properties regarding chemical and mechanical resistance. A more durable alternative to natural latex. The anatomical fit allows working without fatigue. Good flexibility and distinct palm profile allow best sensitivity and sure grip. A cotton flock lining reduces sweating. All in all, a product serial of excellent wearing comfort, high user's acceptance and good efficiency.

Application:

- | | | |
